Profile

Backend engineer working on document-processing services.

Experience

Northwind Analytics (fictional) - Backend Engineer, March 2022 - February 2026
Designed and operated REST services in production for four years.
Owned the relational schema behind the document pipeline.
Presented quarterly architecture reviews to the product and operations teams.

Cobalt Systems (fictional) - Junior Developer, June 2021 - February 2022
Maintained internal reporting tools and their test suites.

Projects

Document understanding pipeline: shipped and maintained a data-processing system that parses uploaded PDFs, extracts their text and indexes it for search.
Built similarity search over sentence embeddings stored in Postgres.

Skills

Python, FastAPI, Postgres, Docker, Bash, pytest

Education

BSc Computer Science, University of the Fictional Midlands, 2021
